

# healow Health Trackers

Encourage patients to better manage their lifestyles and chronic conditions. Using the health tracker feature in the healow app, patients can connect home health monitoring devices and wearables to their healow app account, giving providers the ability to check patients' vital data through the healow Hub within the eClinicalWorks EMR.

Activity Tracker is for manual entries only.

Google Fit is an integrated solution to healow.

All trackers can be used as manual trackers; a device is not required to use healow trackers.

To generate Dexcom Clarity Reports and My Glooko Reports, go to Blood Glucose Tracker -> Reports
